

INSTRUCTIONS FOR USE

Door Lock Box Installation

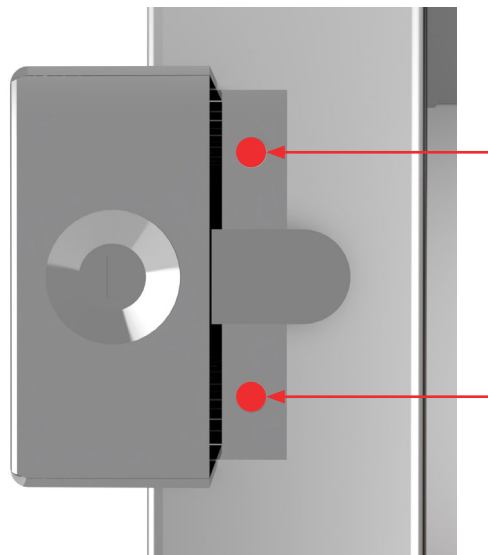

1- Locate key lock so it is 2" from door handle and tongue catches edge of door.

2- Make sure when door is opened, it clears edge of key box by (1/8" - 5/32")

3- After locating lock box on the side of cabinet, drill and tap 10-32 holes for mounting screws. Use a screw with a star locking washer and locking hex nut on the inside. (Note: the side must be removed to attach the locking hex nut to the screw)
